Dear customer,

As I am sure you are aware, the COVID-19 virus is causing reactions among the public that vary from alarm to hysteria. Facility Managers should encourage the following first line of defense behaviors to building occupants as recommended by the CDC:

- 1. Wash hands often with soap and water for at least 20 seconds.
- 2. Cough or sneeze into your sleeve.
- 3. If you feel sick DO NOT go to school or work.

Continue your daily cleaning procedures as normal. Pay close attention to critical contact points such as door knobs, desk tops, switches, keyboards, etc. Use an EPA registered product. We recommend sanitizing common surfaces daily with Envirox 117/118; you may also use Critical Care RTU, ACE 256 or Renegade 3X to disinfect critical contact points. If you have a confirmed case of COVID-19 in your area or in your facility, follow CDC guidelines for a two step disinfection process. Pre-Clean surfaces with a mild detergent to remove gross filth and then apply the recommended disinfectant to surfaces. Allow surfaces to air dry. We currently have the following products available that are EPA-approved with Emerging Viral Pathogen claims.

**Envirox Critical Care Disinfectant
RTU**

**Navigator Ace 256 and Renegade 3x must be utilized with a handheld dilution controller #23203

**Click on 'Resources' on product home page for tech sheets and efficacy information

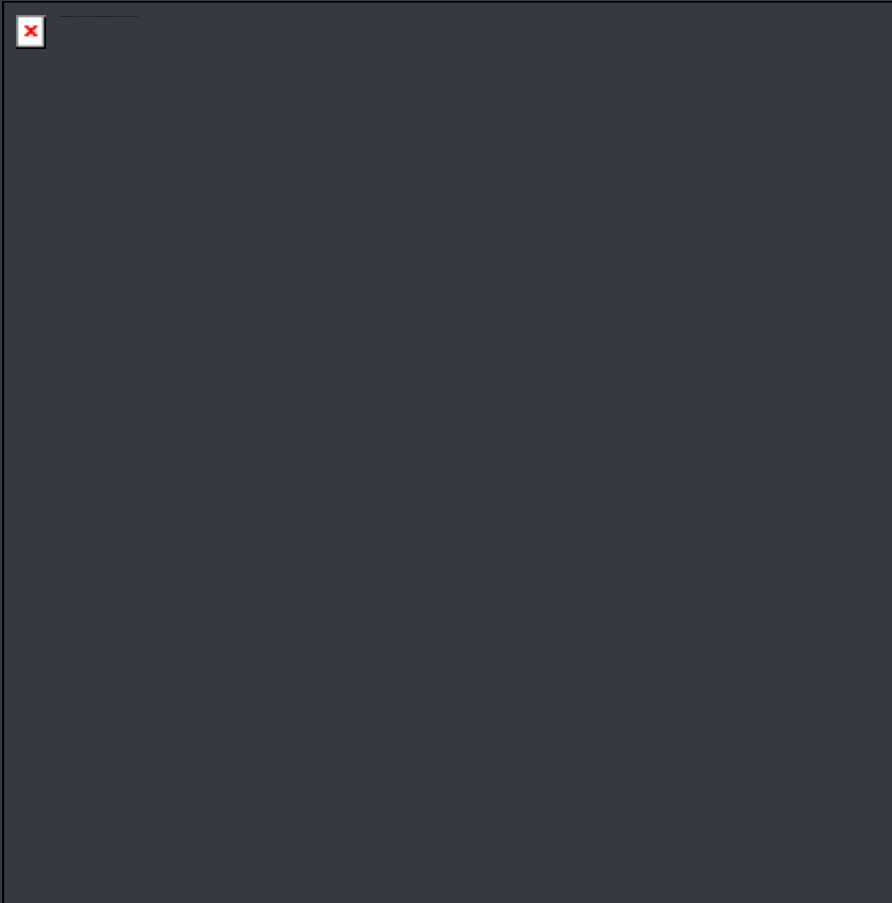

THE FACTS

What is the Coronavirus?

Coronavirus (CoV) are a family of enveloped viruses that were first discovered in the 1960's. They are most commonly found in animals, however, six strains of Coronavirus were known to be capable of transmission from animals to humans. The latest strain is known as the 2019 Novel Coronavirus or 2019-nCoV. It originated in Wuhan, China last year.

How does the Coronavirus spread?

The virus typically spreads through the air via coughing or sneezing, contact with an infected person or contaminated surfaces, and rarely, via fecal contamination. Most people get infected with a human Coronavirus at some point in their lives. They experience cold-like symptoms for a few days and then recover. However, the 2019-nCoV strain can cause severe symptoms including the following: fever, cough, and shortness of breath that can lead to pneumonia and possibly death.

The virus can spread quickly from person to person and can lead to widespread outbreaks when infected individuals travel to different countries. At this time, there is no vaccine or specific treatment for the Coronavirus.

Controlling Infection

The CDC provides [useful guidance](https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html) and resources for Coronavirus infection control measures.

These should all be implemented when patients are suspected of being infected with a Coronavirus.

Hand hygiene: [Wash hands](#)

<https://www.cdc.gov/coronavirus/2019->

[ncov/about/prevention-treatment.html](https://www.cdc.gov/ncov/about/prevention-treatment.html) often with soap and water for at least 20 seconds. Use alcohol-based hand sanitizer when soap and water are not available. Avoid touching your eyes, nose, and mouth with unwashed hands.

Respiratory hygiene and cough etiquette: Cover your nose and mouth with a tissue when you cough or sneeze, then throw the tissue in the trash. Avoid contact with infected individuals, as possible. Clean and disinfect surfaces and objects with an EPA-registered disinfectant.

For 2019-nCov, the CDC also recommends a mask for confirmed individuals, eye protection for healthcare workers, and implementing both contact and airborne precautions in addition to standard precautions.

Products with EPA-approved Emerging Viral Pathogens claims are recommended for use against COVID-19. The disinfectant cleaners listed above have demonstrated effectiveness against viruses similar to COVID-19 on hard non-porous surfaces. Therefore, this product can be used against COVID-19 when used in accordance with the directions. For more information, refer to the CDC website at <https://www.cdc.gov/coronavirus/2019-ncov/>. https://www.cdc.gov/coronavirus/2019-ncov/?inf_contact_key=fee81c6ab84ad13c4c89a76fd26c45f5

Please let us know if you have any questions. You can contact your account representative if you would like to place an order.
